Why China TDI Goes up Again?

2017-07-17

In general, it is not only TDI and PU raw materials that are rising, so do the most chemical raw materials in China. And even the steel and coke industry also go up sharply. Here are the reasons: De-capacity over the various industries is a big background in China, and the strict national environmental inspection breaks regular condition of various industries. Furthermore, purchase limitation in real estate market also makes a large quantity of funds flowing into the commodity circulation market. The above various reasons result in the rise of many kinds of raw materials. Therefore, TDI price rise is not accidental or alone. It's not TDI is powerful but so many products are all go up, and TDI itself is sensitive to price rise. What's more, there are various kinds of incidents stimulating the price rise...[More](#)
