Will PMDI Price Continue to Decline?

2018-03-09

PUdaily, Shanghai-- After peaking in last September, PMDI price began to set on a downward trajectory. This trend can be seen as the aftermath of the previous sharp rise. Price in a market economy always peaks before it goes down to the bottom and then bottoms out. But the combined effects of various factors just make it hard for people to predict and judge these ups and downs. Today, PUdaily will give an analysis to determine how long the declining period will last and when the PMDI price will rebound. We will give you some data on the macro environment before the analysis. In the first quarter of 2018, domestic PMDI production was estimated to stand at 383,000 tons, an increase of 2.4 percent from 374,000 tons over the same period in 2017. In the first quarter, turnarounds conducted by BASF Chongqing and Wanhua Ningbo will inevitably have a negative impact on the supply... [More](#)
