GNFC TDI Facilities' Ups and Downs over the Years

2018-06-20

PUdaily, Shanghai-- Established in 1976 and located in Bharuch district, Gujarat, Gujarat Narmada Valley Fertilizers & Chemicals Limited. (referred to as GNFC) is jointly created by the State Government of Gujarat and Gujarat State Fertilizers & Chemicals Ltd. (hereinafter referred to as GSFC). Both located in Dahej, Bharuch, GNFC's two TDI facilities adopt DuPont's production technology. The Phase I TDI facility has a capacity of 17,000 tons/year. And the Phase II facility, which was put into production at the end of 2013, has a capacity of 50,000 tons/year. In addition to supplying domestic market, GNFC also exports its TDI to Africa, Latin America and other markets...[More](#)

Where is the Next Support Level as TDI Price Continues to Decline?

2016-06-19

PUdaily, Shanghai-- At the end of April, the TDI price rallied. The bullish sentiments were strong as the manufacturers increased their fixed offers continuously. Due to their reluctance to sell goods, the price gradually rose. In early June, the dealers' shipments were blocked because downstream purchase of high-priced goods became rare. In order to facilitate the sale, they frequently brought to market low-priced goods. Thus, the delicate balance was disrupted...[More](#)

How Should We View the Sluggish PMDI Demand?

2018-06-19

PUdaily, Shanghai-- Into the peak season of April, the PMDI price didn't repeat the upward trend seen in previous years, but rather fluctuated in the range of RMB 20,000-23,000/ton. At a time when busy season is not busy, most of market participants say that this year's downstream demand is extremely low. But how low is it? Next, PUdaily will explain by presenting the data collected in the form of charts...[More](#)

Innovations by BASF Will Help to Make Electric Vehicles a Practical Reality for Everyone

2019-06-14

With the holiday season and sunnier days approaching in the northern hemisphere, traffic inevitably increases on highways, in cities and around sightseeing spots. Additionally, a rising number of commuters contribute to growing nitrogen oxide and carbon dioxide emissions with adverse impacts on air quality and climate. By 2025, there will be approximately 1.5 billion cars on the roads worldwide...[More](#)

Covestro Rejoices TPU Capacity Expansion Start to Meet Growing Demand

2018-06-14

Covestro LLC recently hosted a ribbon-cutting ceremony at its New Martinsville, West Virginia, production facility, commemorating the successful startup of its thermoplastic polyurethane (TPU) capacity expansion. Part of a global investment strategy, the additional capacity in North America reaffirms the company's commitment to supporting growth and innovation as global demand for TPU continues to rise...[More](#)

Dow to Make Phased Expansions of Global Glycol Ethers Capacity

2018-06-15

The Dow Chemical Company (Dow) announced a series of phased, incremental investments to expand its global glycol ethers capacity to meet increasing demand in key end-markets and applications. Once complete, the Company will have nearly doubled its current capacity of these product lines...[More](#)

Innovation Prize For Plastics From Plants

2018-06-14

Covestro has received an innovation award offered by the German government and industry for a research breakthrough in the production of plastics from renewable raw materials. This makes the materials manufacturer one of the hundred winners of the Germany-wide competition "Excellent Landmarks in the Land of Ideas". The prize was awarded for a newly developed process for producing the important basic chemical aniline from plants instead of crude oil...[More](#)

Potential Chemical Raw Materials From China That May See Higher Tariffs

2016-06-20

The Office of the United States Trade Representative (USTR) today released a list of products imported from China that will be subject to additional tariffs as part of the U.S. response to China's unfair trade practices related to the forced transfer of American technology and intellectual property...[More](#)
