Analysis of Polymeric MDI exports from China, Japan and South Korea to India from January to 2019-02-15

From January to October 2018, China exports about 32,000 tons of polymeric MDI to India, basically as same as last year, accounting for 6% of China's total exports of polymeric MDI, 1% lower than last year. Compared with the same period of last year, there is a significant decrease among April and May. On the one hand, because of the approaching rainy season in India, the demand begins to decrease; on the other hand, because of the adjustment of manufacturers' marketing strategies and the choice of local buyers in India. In August and September, compared with the same period last year, there is a big increase, mainly due to the traditional low season approaching the end; some downstream manufacturers begin to stock up.
